## Background

From its small beginnings in early nineties, Panorama has become a giant in the wide field of steel works encompassing transport & communication, industrial, structural, architectural, institutional, food processing and medical.

Today we operate from our own spacious premises named Panorama Business Park in Ruiru, offering a modern facility with design and drafting department, fitting and machine shop, fabrication and assembly areas, industrial blasting and painting, and corporate services office.

We place high premium on excellent services delivery and recognize this as a critical factor in attaining our goals. Panorama is therefore committed to not only meeting its customers expectations but also surpassing them.

## Commitment

Our commitment is future oriented and borne of the demand for quality and timely engineering fabrication solutions in the industry. We strive to evolve seamlessly with technological advancements in order to be the vehicle of innovation for our clients in a highly competitive global landscape. "Quality in service"

## Vision

Our vision is to be the preferred choice in the greater Eastern and Central Africa regions for the provision of World class Fabrication Engineering solutions, Procurement and construction in the fields of Electro-Mechanical, Hydraulic, Architectural, Agricultural, and Structural Engineering.

## Mission

Our mission is for the provision of consistent, timely, cost effective and quality bespoke solutions to our clients, while maintaining unmatched reliability and safety in our relentless pursuit of the highest standards of Quality.

## Safety Health And Environment Policy

Within the context of maximizing long term value, P.E.T is committed to operating as environmentally responsible company and is committed to providing a safe and healthy workplace for its employees. P.E.T will comply with all applicable environmental, health and safety laws and regulations in every country in which the company does business. In locations where environmental, health or safety regulations do not exist, or where the legal requirements do not adequately protect the environment or employees, P.E.T will develop and implement internal and appropriate operational EHS standards. P.E.T will provide the necessary resources to meet this commitment at all facilities and P.E.T management will be held accountable for environmental health and safety performance.

## *What we deal in*

Our services include:

- ▶ **Truck Body Design and Fabrication**
- ▶ Manufacturing and Supply of Institutional and Office Furniture
- ▶ Manufacture of Stainless Steel Products and Stainless Steel Fabrication Works
- ▶ Industrial Plant Installations and Maintenance
- ▶ Architectural and Steel Works
- ▶ Manufacturing of Steel Overhead Powerline Distribution accessories
- ▶ Specialized engineering products supplies
- ▶ Building and Hardware supplies

## OPERATIONS DIVISIONS

### Truck Body Design and Fabrication

Agricultural and Automotive (Utility Trailers, Processing trailers, truck bodies, bowsers, agricultural trailers, Tanks)

We offer a vast range of truck fabrication solutions.

**Closed Body Type**

**Open Body Type**

**Stainless Steel  
Body Type**

## Architectural Fittings and Installations

Our work ranges from decorative showpieces to discreet workhorses that blend into the design scheme. We work closely with architects and designers in bringing concepts and designs into manufacture. We provide professional advice on suitability, performance and finishes.

We offer a diverse portfolio ranging from gates & barriers; windows, Cladding & facades to canopies & sculptures. Our service is highly flexible, we can work with existing designs or provide in-house design services to develop a concept to drawing stage.

We fabricate in-house and install on-site, acting as main contractor or sub-contractor and often, as project managers.

## Structural Steel and Framing

(Signage, high voltage tower, tank towers, com towers, Platforms, Canopies)  
Located at our head offices, our full-service fabrication facility has a total production space of ten thousand five hundred (10,500ft<sup>2</sup>) square feet, with overhead cranes totalling three (3) tonnes lifting capacity, and the capability to handle the largest and most challenging projects.

The erection of our steel structures is completed in a timely and economical manner. Our field installation crews hold safety as a priority and our management systems ensure full compliance with the established designs and quality expectations. Our operational teams help to ensure a smooth process through the provision of proper transportation of materials, unloading and storage facilities, and adequately prepared craning and staging areas. To ensure trouble-free operation and quality erection, every aspect of our work is continually checked and rechecked.

## Stainless Steel

From construction to medical and food industry, we supply a vast range of products into many different sectors. Our range of products and component parts manufactured in Stainless steel has increased dramatically with the introduction of new technologies and expanded design capabilities. We service a broad range of industries with our sheet metal, machining and expanded engineering and fabrication capabilities.

A reliable agricultural fabrication solution provider is necessary for a wide variety of agricultural equipment — not just storage equipment (Bins, Hoppers, Tanks, shelving, Racks...), tractor trailers, but animal pens, spray races, feeders, poultry cages, animal handling equipment and more. All our metal fabrication work is performed in our facility.

## Institutional Furniture

As the core of Panorama engineering, we manufacture standard and custom institutional furniture. Products include control room consoles, workstations, racks, desks/tables, walls/partitions, bookcases, cabinets, beds and chairs. We serve airport, Medical, Food, audio/visual, military, networking, power plant, prison, process control, education, surveillance, and transportation industries. We offer in addition custom manufacturing, contract manufacturing and private label manufacturing to meet supplier and client demands.

## Plant and Industrial

We offer support services for industrial plant management stemming from servicing and maintenance of manufacturing equipment and plants to commissioning and decommissioning of plant equipment with emphasis on refrigeration systems, air conditioning & ventilation, bulk storage tanks (Fluids), hoppers/bins, Storage & racking solutions, Conveyor systems and access management. We provide a robust consultancy in helping to devise appropriate solutions to any and all plant related problems within our field of expertise.

## Machine Shop Services

We continue to increase our capabilities. We are now able to incorporate most (if not all) our manufacturing processes in-house. we provide complex and precision parts for many industries including Food, commercial, medical, as well as the Department of Defence. Our areas of specific specialization include:

- **Custom Machining**

With top-of-the-line machines, we provide you with precision parts.

- **Tool & Die**

Design, Die Build & Die Repair.

- **Reverse Engineering**

From rebuilding your broken components to current components, we provide designs and new machined parts.

**Laser Engraving Machine**

**Guillotine Machine**

**Power Press Machine**

**Big-bore- precision lathe machine**

**Hydraulic Bender**

## Design

We are fully-equipped with CAD (computer aided drafting) software and tools and are in the process of further developing and expanding our 3D Modelling capabilities which translate to enhanced productivity, improved operating efficiency, and minimal errors saving valuable time and costs for our clients.

## Powder coating

Giving you the best in powder coating finishes that meet the highest quality standards, applying powders developed using the latest technology. Our services include specialty finishes in an extensive range of powder coating colors, suited to a variety of metal and aluminium surfaces and products. We are leaders in environmentally sound practices, ensuring all by-products are recycled or properly disposed of after appropriate treatment.

## Clients

## What Our Customers Say...

*"It's refreshing to find a partner that can meet both specification and time deadlines for our emergency operations"*

*Elizabeth Osodo*

*Procurement Manager, Kenya Red Cross.*

*"Maintaining a good reputation through competence and effective service delivery, quite exemplary"*

*Sheila Akala*

*Ag. Head of Procurement Manager, New Kenya Corporative Creameries.*

*"Working together for over 10 years, we have found that their reliability is unquestionable. They would be a real asset to any future partners in business."*

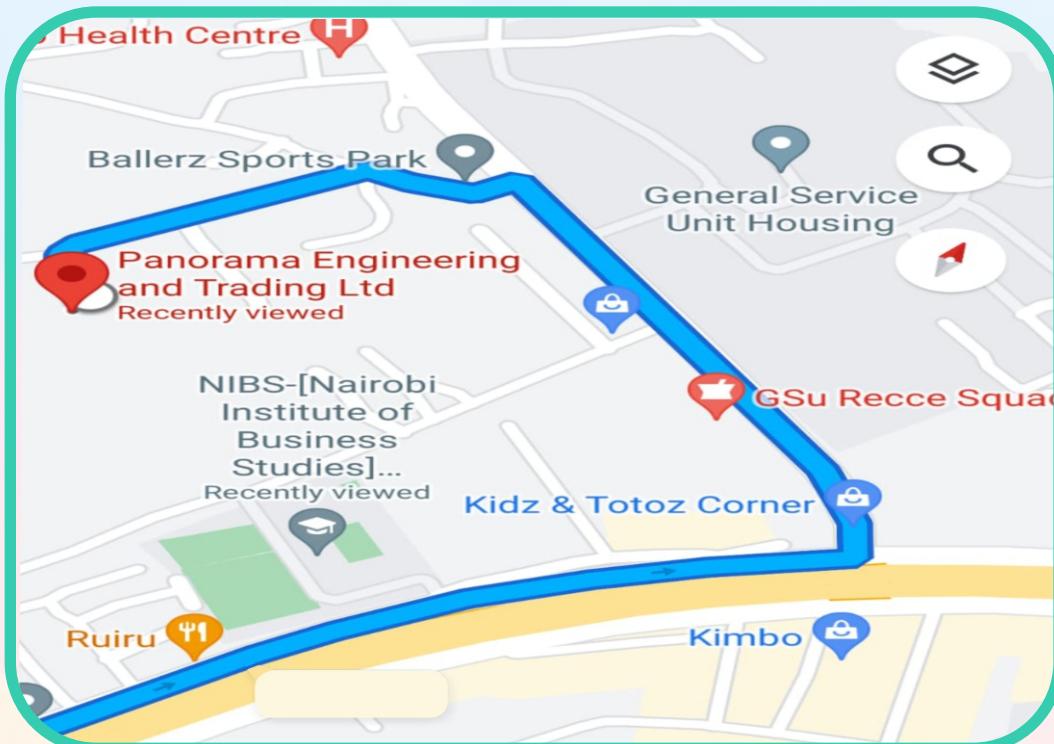

*Eva Anjichi*

*Ag. Supply Chain Manager, Procurement, Kenya Power & Lighting Co.*
